## SURROUND YOUR BUSINESS WITH REVOLUTIONARY NEW SOFTWARE AND SUPERIOR SUPPORT.

Want to help your business achieve a higher degree of success with more of the tools you need to see your business from every angle? Then step up to a new level of performance for your business with the latest upgrade for your Sage MAS 90 or Sage MAS 200 ERP system. Version 4.2 is coming this spring. And, if you renew your ClientCare plan now, you'll soon receive breakthrough enhancements that will boost visibility and productivity throughout your organization, including:

- **New Business Insights Explorer** – Heighten your agility when reacting to business challenges and opportunities. This new portal accesses data from across your company. Using ground-breaking inquiry and analysis tools, you can then turn that data into actionable, fact-based knowledge.
- **Business object framework for core accounting** – Get more efficient data entry, enhanced Crystal Reports®, deeper batch auditing, more powerful user-defined fields that track to reporting, and much more—thanks to an accounting system that now benefits from a business object framework.
- **Built-in CRM integration** – Improve customer loyalty and sales with an enhanced integration to any three CRM solutions from Sage Software—SageCRM, Sage SalesLogix, or ACT! by Sage.
- **Extensive AP customer-requested improvements** – In a recent customer survey, you told us you want to be able to capture more detailed information by passing invoice comments on to the check register, as well as alpha-numeric check numbering. With version 4.2 you'll get the functionality you've been asking for, and much more!

Renew your ClientCare plan now and bring your Sage MAS 90 or 200 system full circle. Extend the automation of your business processes even farther with increased functionality that can help you take on new challenges as they arise.

**Get back on plan today and receive Sage MAS 90 or 200 v4.2 early this spring!**
