

Acumatica Cloud ERP Improves Growth, Productivity, and Flexibility with Accredited Testing Service

"Our team is much more mobile [with Acumatica Cloud ERP] in this new hybrid, work from home, work from anywhere world. They love it! We have also experienced substantial increases in productivity, improvements in data integrity & reporting, and it allows our team to stop wasting time on low impact work & refocus their time more on higher priorities that add value to our clients."

- Brad Bonomo, Compliance Testing, Chief Operating Officer

OVERVIEW

Since 1963, Compliance Testing, LLC (CT) has provided accurate & reliable, electronic regulatory product-testing on behalf of agencies like the FCC, European Union, UK, Canada, South Korea, Japan, Australia, New Zealand, and more.

CT's expert engineering services open the doors to global markets for small, mid-market and enterprise emerging tech manufacturer client devices in areas including: Telecom and Wireless, Smart Home, Smart City, IoT and Consumer Electronics, Industrial Equipment, MedTech, Medical, and Health and Wellness.

As of 2021, CT is the only test lab in the world that offers CSSI P25 Field Testing, as well as being one of just a few hundred Telecommunications Certification Bodies (TCB).

CHALLENGES

As technology advanced, Compliance Testing was tired of dealing with redundant data entries, low impact manual work, remote challenges, problems with data syncing, and data integrity with multiple data sources in a CRM / accounting system. These challenges made daily business processes strenuous and overwhelming to manage.

When looking for an ERP software, CT decided they needed to a solution that would answer to the following requests:

- A CRM under the Financial Suite with the functionality to have a price list with shifts as a unit of measure, associate emails to project records, and convert opportunities to projects.
- Sales automations.
- Integrated marketing solution.
- Purchase Order Management module.
- A solution plus SmartSheets to effectively meet all operational needs.

SOLUTION

Compliance Testing deployed Acumatica cloud ERP in August 2020, gaining a single solution to operate their business that led to improved remote challenges, greater data transparency, and numerous operational efficiencies.

IMPACT

With Acumatica, Compliance Testing consolidated multiple on-premise business applications into one cloud platform; streamline workflows, eliminate redundant entry, and obtain the benefits of mobility in a work from anywhere world.

On a daily basis, the CT Team experiences substantial increases in productivity, and improvements to data integrity and reporting. The team no longer spends countless hours on low impact projects, Acumatica provides the resources and flexibility for team members to focus their time and energy on high value projects.

KEY RESULTS AND BENEFITS

- Gained one centralized ERP, increasing business performance visibility for management.
- Leveraged the cloud, eliminated redundant data entries.
- Provided information instantly, shaving time spent gathering data for reporting from hours to minutes.
- Acquired easy-to-use solution, one that managers and employees love.
- Improved data accuracy, streamlining workflows and saving employees time for more relevant tasks.

WHY CHOOSE ACC SOFTWARE SOLUTIONS AND ACUMATICA?

"The partner support [with ACC Software Solutions] and hands on ability to walk us through what operating our business would be like, realistically, on this platform. The personal relationship, time investment to truly learn our business, and awesome functionality of Acumatica brought it all together. A lot of ERPs look great in the demos, our team at ACC and Acumatica made sure it would work after launch."

-Brad Bonomo, Compliance Testing, Chief Operating Officer
