Acumatica R1 2025 Updates

Exciting Updates to the Acumatica Release

We're thrilled to share some exciting changes coming to the Acumatica update process that will make managing your ERP system easier and more efficient than ever! Starting with Acumatica 2025 R1, the company is introducing a new approach to patches and service releases that promises faster fixes, minimal downtime, and greater flexibility for users. Here's everything you need to know about these updates and how they'll benefit your business.

Key Changes to the Update Process

Acumatica is shifting away from the traditional monthly updates to a more streamlined approach with two primary types of releases:

1. **Patches** – These are targeted, quick fixes that address critical system issues, security concerns, or core functionality problems. Patches will be automatically applied to all SaaS customers, ensuring your system stays secure and functional with minimal disruption.
2. **Service Packs** – These consolidated releases bundle together all the previously released patches, along with additional fixes and improvements. Service Packs will be optional and can be deployed at your convenience, offering greater control over when and how you apply updates.

This change will help you keep your Acumatica system running at peak performance with less downtime and more predictable updates.

Continued from Page 1...

...but helped shape the future of our solutions. From expanding our team to launching new service offerings and delivering more personalized client experiences, we're committed to staying ahead of your evolving needs.

Thank you for being such an important part of the ACC family. We're proud to be on this journey with you and can't wait to see what we'll accomplish together in the months ahead.

Warm Regards,

Sean Atkins
President, ACC Software Solutions

Acumatica R1 2025 Updates

KEY FEATURES AND IMPROVEMENTS

How These Changes Benefit You

✓ **Faster Fixes, Less Disruption:**

With the introduction of Patches, critical issues will be addressed quickly without waiting for the next larger monthly update. Patches are automatically deployed during off-hours with minimal downtime (only 2-3 minutes for an application server restart).

✓ **Greater Flexibility:**

While Patches will be automatically applied, Service Packs are optional, allowing you to schedule them at a time that's convenient for your business.

✓ **Improved Stability:**

Since Patches target specific issues, they are less likely to introduce new challenges or affect your customizations and integrations. Service Packs consolidate these fixes, ensuring that your system stays current without unnecessary updates.

✓ **What's the New Release Cadence?**

Here's an overview of the new release schedule for Acumatica:

- **Patches:** Released every 2-4 weeks, automatically deployed for SaaS customers.
- **Service Packs:** Released every 3-4 months after a major version release, with optional deployment.
- **Major Versions:** New features and platform improvements will be released twice a year, with a preview sandbox available for SaaS customers before upgrading.

✓ **What Does This Mean for Your Business?**

Whether you're a SaaS Always Current or Flex customer, or a Private Cloud user, this new update process will make system maintenance smoother and less time-consuming. You'll enjoy faster critical fixes, fewer disruptions, and more control over when you update your system.

For **Private Cloud** customers, patches will still be available through the Acumatica Community, along with detailed installation instructions. Service Packs can be downloaded from the community as well, giving you the tools to stay current at your own pace.

✓ **Ready for Acumatica 2025 R1?**

We're excited about the changes coming with Acumatica 2025 R1 and believe they will significantly improve your ERP experience. As always, if you have questions or need assistance with these changes, don't hesitate to reach out to our team or visit the Acumatica Community for more information.

Stay tuned for further updates, and happy updating!

What's new in Sage 100 2025?

EXCITING SAGE 100 UPDATES THAT POWER YOUR BUSINESS FORWARD!

We're thrilled to announce new updates for Sage 100, including **Sage 100 2025**, **Sage 100 2024.2**, **Sage 100 2023.5**, and **Sage 100 Payroll 2.25.1**. These updates bring fresh features and powerful enhancements designed to streamline your operations, improve security, and boost your overall efficiency.

What's New in Sage 100 2025?

The Sage 100 2025 release introduces several game-changing updates, many of which come directly from customer feedback. For example, you can now expand your invoice numbers from 7 to 20 characters in Accounts Receivable, providing greater flexibility for your invoicing needs. Additionally, the ability to create quotes within Purchase Order Entry and email Requests for Quote (RFQs) to vendors directly via Paperless Office will help accelerate your procurement process.

On the security front, there are enhanced protections for your reporting system with an updated version of Crystal Reports Runtime. Plus, with features like audit tracking for Sales and Purchase Orders and extended item descriptions on customer-facing documents, managing your business just became smoother and more transparent.

What's new in Sage 100 2025? continued...

EXCITING SAGE 100 UPDATES THAT POWER YOUR BUSINESS FORWARD!

Enhancements in Sage 100 2024.2 & 2023.5

While Sage 100 2025 takes the spotlight, we haven't forgotten about users of Sage 100 2024.2 and 2023.5. These versions now include the same powerful Supply Chain Intelligence Integration, offering advanced visibility into your supply chain. This new tool, available exclusively until Fall 2025, will help you optimize your processes and make data-driven decisions with ease.

Additionally, improvements to Production Management enhance the user experience and provide more flexibility, ensuring smoother daily operations.

Sage 100 Payroll 2.25.1: Smarter Payroll Management

For payroll teams, the Sage 100 Payroll 2.25.1 update brings efficiency to the forefront. With the new ability to print employee listings and mailing labels based on hire date, payroll processes are now even easier to manage. The update also brings enhanced flexibility in printing payroll checks and direct deposit stubs, as well as new tax messaging to ensure compliance with resident and non-resident tax rules.

Why You Should Update Now

Staying up to date with the latest Sage 100 releases isn't just about adding new features, it's about securing your system and improving your overall business performance. The latest updates improve reporting, increase security, and offer fixes that make your system run more smoothly.

By upgrading to Sage 100 2025, 2024.2, or 2023.5, you'll be equipped with the tools to work smarter, faster, and more securely, keeping your business ahead of the competition.

Sage Business Partner

Sage Future 2025

WHAT WE'RE EXCITED ABOUT FROM A PARTNER'S PERSPECTIVE

Sage Future 2025 showcased the innovations that will shape the next era of ERP, and we're energized by what's coming. From AI-powered decision-making to cloud-native flexibility, the announcements coming out of the event reinforce why we're proud to partner with Sage.

Looking Toward the Future of ERP

Sage is pushing ERP into the future with smarter automation, deeper analytics, and scalable cloud platforms. These updates are set to have a direct, positive impact on the clients we serve, helping them make faster decisions, improve efficiency, and stay competitive.

We're especially enthusiastic about the new AI features designed to drive intelligent forecasting and real-time insights. This kind of innovation is exactly what our clients are looking for to modernize their operations.

Innovations That Matter to Our Clients

The shift toward cloud-native ERP platforms like Sage Intacct and the continued evolution of Sage X3 are opening up new opportunities for our clients, particularly around scalability, security, and integration.

With a strong focus on AI and automation, Sage is enabling businesses to operate more strategically. We're already exploring ways to incorporate these features into the solutions we deliver, so our clients can benefit from faster insights, smarter workflows, and stronger outcomes.

Ready for What's Next

We're actively preparing our teams to adopt and implement these new tools. Whether it's deploying the latest features in Sage X3, optimizing financial operations through Sage Intacct, or helping clients make the leap to a fully cloud-based ERP, we're ready.

Looking Ahead

The future of ERP is intelligent, flexible, and built for growth; and Sage is leading the way. We're excited to be part of that journey and to bring these innovations to life for our customers.

Making the Switch from Quickbooks to Acumatica

STILL USING QUICKBOOKS FOR INVENTORY? HERE'S WHY BUSINESSES ARE SWITCHING TO ACUMATICA

QuickBooks is great for getting started, but as your business grows, it can start to hold you back. If you're juggling workarounds, manual data entry, or struggling to track inventory across multiple locations, it's probably time for a change.

Why Acumatica?

Acumatica is a modern cloud ERP designed for growing businesses that need more than just the basics.

✓ Real-Time Inventory Visibility

Track stock levels, locations, and movement instantly—no delays, no guesswork.

✓ Advanced Inventory Features

Built-in support for:

- Multi-warehouse and bin tracking
- Lot/serial number control
- BOMs, kits, expiration dates, and more

✓ Fully Connected System

Integrates inventory with sales, purchasing, finance, and eCommerce—no silos.

✓ Cloud-Based Access Anywhere

Stay connected whether you're on-site or remote.

When to Consider Switching:

- Inventory errors are piling up
- You can't trust your stock numbers
- You're spending too much time on manual processes

The Bottom Line:

QuickBooks is a great starting point, and for many businesses, it's all they need for a long time. But if your inventory is starting to outgrow what QuickBooks was designed to handle, that's not a bad thing, it's a sign you're growing.

Acumatica gives you the tools to manage that growth with confidence, accuracy, and less stress. When you're ready to level up, it's there to help you do it smoothly.

What's Next With Sage 100 and AI?

BRINGING INTELLIGENCE AND INSIGHT TO YOUR EXISTING ERP - NO MIGRATION REQUIRED

If you're like many ACC Software Solutions clients, you rely on Sage 100 to keep operations running smoothly, but you're also looking for smarter, faster ways to make data-driven decisions. AI is changing how companies plan inventory, manage receivables, and monitor performance, but you don't need to migrate platforms or overhaul your ERP to benefit.

There are intelligent tools that ACC can help you connect to Sage 100 right now to unlock real-time answers to questions like:

- What items are at risk of going out of stock?
- Which customers are falling behind on payments?
- Where am I carrying too much inventory?

Tools That Bring Intelligence to Sage 100:

Tool	Key Features	Use Cases
Netstock/Sage Inventory Advisor	Cloud-based inventory forecasting, stock-out and excess alerts, automated replenishment planning	Inventory optimization, demand planning
Sage Data & Analytics	Prebuilt dashboards across modules, AR aging analysis, late-payment alerts, visual reporting	AR tracking, financial and operational visibility
Sage Enterprise Intelligence (SEI)	Flexible dashboards and reports, real-time web analytics across departments	Purchasing, inventory, and sales analysis
Business Insights Dashboard	Built-in Sage 100 dashboard with customizable KPI panels and drill-down reports	Quick operational views inside Sage 100
DataSelf Analytics	BI engine powered by Tableau/Power BI, natural-language queries, mobile dashboards, smart alerts	Interactive dashboards, ad-hoc analysis

You don't need to switch ERP systems to bring AI-style intelligence into your business. With the right tools and ACC's support, you can make your **Sage 100** system work harder and smarter, today. Want a quick walkthrough of one of these tools or a tailored recommendation for your environment? Just reach out to your ACC consultant, we're ready when you are.

We Value Your Feedback!!

HELP US, HELP YOU

At ACC Software Solutions, our commitment to excellence extends beyond providing top-notch products and services. We strive to continuously improve and evolve to better meet the needs of our valued customers. Your feedback is an essential part of this process, and we would greatly appreciate your input.

How You can Provide Feedback:

- ✓ **Customer Surveys:** Keep an eye out for surveys sent via email or available on our website. These surveys cover various aspects of our products and services, allowing you to share your thoughts and suggestions.
- ✓ **Direct Communication:** Feel free to reach out to our customer support team or your dedicated account manager with any feedback or concerns you may have. We're here to listen and assist you in any way we can.
- ✓ **Online Reviews:** Share your experiences with ACC Software Solutions on review platforms or social media channels. Your reviews help prospective customers make informed decisions and contribute to our ongoing improvement efforts.

Our Commitment to You:

- ✓ **Transparency:** We value transparency and will keep you informed about how your feedback is being utilized to drive positive changes within our organization.
- ✓ **Continuous Improvement:** Your feedback isn't just heard; it's acted upon. We are committed to implementing meaningful improvements based on your input to ensure your continued satisfaction.

Share Your Thoughts Today:

Your feedback is invaluable to us as we strive to deliver exceptional products and services tailored to your needs. Whether it's a suggestion for improvement, a feature request, or simply sharing your positive experiences, we encourage you to reach out and let your voice be heard.

Together, we can shape the future of ACC Software Solutions and create even greater value for our customers. Thank you for your continued support and partnership.

3rd Party Spotlights

ACUMATICA AND SAGE 100 INTERGRATIONS

We are excited to shine the spotlight on the 3rd party integration capabilities of Acumatica and Sage 100, leading ERP platforms. With these robust ecosystems of integration partners, you can seamlessly connect and integrate Acumatica or Sage 100 with a wide range of complementary applications, empowering your organization with enhanced functionality, automation, and efficiency.

Velixo brings Excel-powered reporting to your ERP. Built for Acumatica, Velixo turns Excel into a dynamic, real-time financial reporting tool, so finance teams can analyze, report, and act faster with the tools they already know.

Nuvei is the payments partner for ambitious businesses. With global reach and local expertise, Nuvei delivers seamless, secure payment solutions that help businesses accept more payments, in more ways, from anywhere in the world.

Avalara is automated tax compliance for modern businesses. From real-time sales tax calculations to filing and remittance, Avalara simplifies the entire process with powerful integrations and up-to-date tax intelligence, so your team can stay focused and compliant.

CONTACT ACC SOFTWARE SOLUTIONS FOR AN IN-DEPTH CONVERSATION OF YOUR EVOLVING SOFTWARE NEEDS

These are just a few examples of the countless possibilities that 3rd party integrations offer with Acumatica and Sage 100. By leveraging the power of integration, you can extend the capabilities of your ERP, tailor the system to your specific needs, and drive operational excellence.
