

A Word from the ACC President

SEAN ATKINS

As we move into the third quarter of 2026, many organizations are looking for ways to build on the progress they've made so far this year. As businesses grow, having systems that connect people, processes, and data becomes increasingly important.

Throughout this quarter, we've focused on solutions that help organizations get more from their ERP investment. From reporting and business intelligence to integrations, automation, and security, today's technology offers new opportunities to improve efficiency without adding unnecessary complexity...

Growing Beyond Your ERP

HOW CONNECTED BUSINESS SYSTEMS DRIVE GROWTH

Your ERP manages the core of your business, but growth often requires additional tools that improve reporting, automate processes, and connect information across your organization. Modern ERP platforms like Sage 100 and Acumatica are designed to work with specialized applications that help businesses become more efficient without replacing their existing systems.

Why Extend Your ERP?

Businesses are connecting solutions that support:

- Financial reporting
- Business intelligence
- AP automation
- EDI & supply chain
- Secure remote access
- Document management

These integrations reduce manual work while providing better visibility across every department.

Continued from Page 1...

At ACC Software Solutions, we're committed to helping customers identify practical ways to improve their ERP systems while preparing for future growth. We appreciate the opportunity to work with your team and look forward to continuing to support your business throughout the remainder of the year.

✓ Is Your ERP Ready for Growth?

- ☐ Manual data entry across systems
- ☐ Spreadsheet-based reporting
- ☐ Limited real-time visibility
- ☐ Disconnected business applications
- ☐ Manual AP or order processing
- ☐ Limited remote access
- ☐ No business intelligence dashboards

Checked two or more? It may be time to extend your ERP with integrated solutions.

What's New in Sage 100 2026

NEW FEATURES DESIGNED TO IMPROVE PRODUCTIVITY

Sage 100 2026 continues to deliver practical enhancements that help users work more efficiently while improving access to information throughout the system. New AI-powered tools, expanded search capabilities, and usability improvements are designed to simplify everyday tasks while helping organizations get more value from their ERP investment.

AI-Powered Help

One of the newest additions in Sage 100 2026 is AI Help, allowing users to ask questions in natural language and quickly receive relevant answers within the Help system. Rather than searching through documentation, users can find guidance faster and spend more time getting work done.

Benefits include:

- ✓ Faster answers to common questions
- ✓ Reduced time searching documentation
- ✓ Easier onboarding for new users

Usability Improvements

Sage continues refining the overall user experience with updates that simplify navigation and improve workflow efficiency.

Highlights include:

- ✓ Streamlined navigation
- ✓ More intuitive screen layouts
- ✓ Faster access to frequently used tasks

Financial & Inventory Enhancements

The latest release also includes updates designed to improve financial processes and inventory management.

Recent enhancements help organizations:

- ✓ Improve transaction accuracy
- ✓ Streamline purchasing workflows
- ✓ Enhance inventory visibility
- ✓ Increase operational efficiency

Global Search

Finding information is now easier with the new Global Search feature. Users can quickly locate customers, vendors, inventory items, sales orders, invoices, and other records from one convenient search window.

Key advantages:

- ✓ Search across multiple modules
- ✓ Find records in fewer clicks
- ✓ Improve daily productivity

Global Search Example:

MAKING THE MOST OF SAGE 100

Sage 100 2026 continues to focus on meaningful enhancements that improve the way users work every day. While many of these updates are designed to simplify common tasks, together they help organizations increase productivity, improve access to information, and reduce manual effort. If you're planning an upgrade or want to learn how these new features can benefit your business, ACC Software Solutions is here to help.

What's New in Acumatica

CONTINUING TO BUILD A SMARTER CLOUD ERP

Acumatica continues to expand its cloud ERP platform with enhancements that improve usability, automation, and connectivity. Recent updates focus on helping businesses work more efficiently while making it easier to access information, automate processes, and integrate with the applications they rely on every day.

AI-Powered Productivity

Artificial intelligence continues to become a bigger part of the Acumatica experience.

Highlights include:

- ✓ AI Advisor & AI Assistant
- ✓ AI Studio enhancements
- ✓ Smarter workflow automation
- ✓ Faster access to business insights

Built for Integration

Acumatica's open platform allows businesses to extend their ERP with specialized applications.

Popular integrations include:

- ✓ BILL
- ✓ Velixo
- ✓ Nectari
- ✓ eZCom (Lingo)

Modern User Experience

The Modern UI continues to receive enhancements that improve navigation and simplify daily tasks.

Recent improvements:

- ✓ Cleaner screen layouts
- ✓ Improved dashboards
- ✓ Better personalization
- ✓ Streamlined navigation

Why It Matters

Today's businesses need technology that can adapt as they grow. Acumatica's flexible architecture makes it easy to add new users, locations, and integrated applications while keeping data connected across the organization.

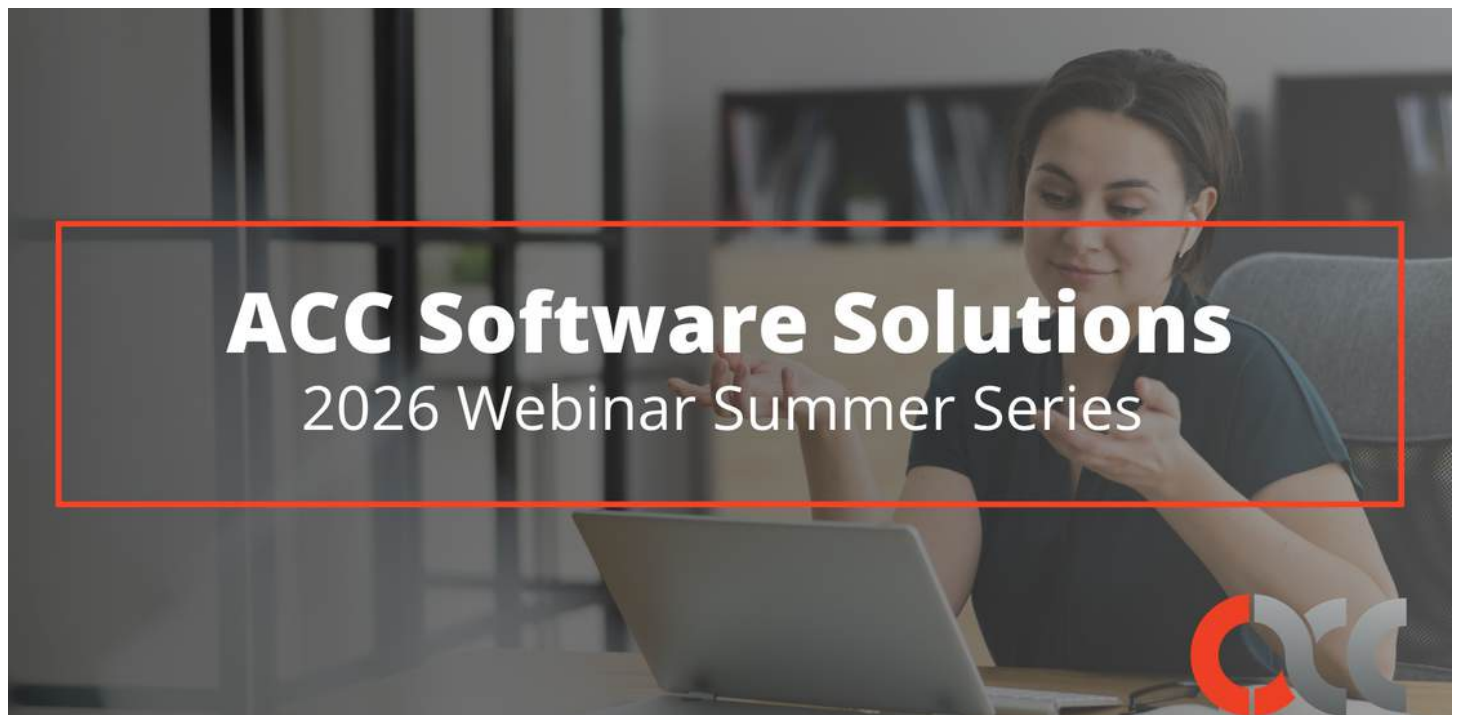

ACC Summer Webinar Series

Practical Solutions for Today's ERP Users

This July, ACC Software Solutions is hosting our 2026 Summer Webinar Series, featuring a new educational webinar every Thursday with leading ERP technology partners. Each session is designed to help organizations get more value from their ERP through automation, reporting, business intelligence, system integration, and secure application delivery.

Whether you're looking to streamline financial processes, build better reports, automate order management, or modernize your Sage 100 environment, our Summer Series offers practical insights and live demonstrations that can help your business operate more efficiently.

Registration for upcoming webinars and recordings of past sessions are available at:

www.4acc.com/webinars

June 25 | 2:00–2:45 PM ET

BILL: Procure. Pay. Predict.

True cash flow visibility begins with connected financial processes. In this session, BILL demonstrates how integrating procurement and accounts payable creates a more proactive approach to managing working capital. Attendees will learn how AI and automation help eliminate manual invoice processing, improve

forecasting, streamline approvals, and provide real-time visibility into cash flow. The webinar also includes a live demonstration of BILL's integrated AP automation platform and how organizations can reduce bottlenecks while making faster financial decisions.

Velixo: Unlocking Real-Time Reporting in Acumatica

Discover how Velixo transforms reporting by bringing live Acumatica data directly into Microsoft Excel. Instead of relying on exported spreadsheets, users can build dynamic financial, operational, and inventory reports that update in real time.

This session covers Excel-based reporting, Acumatica Generic Inquiries, writeback and pushback capabilities, import routines, and practical reporting examples that help finance and operations teams reduce manual work while improving reporting flexibility.

July 9 | 1:00–1:45 PM ET

July 16 | 1:00–1:45 PM ET

Nectari: Smarter Reporting and Business Intelligence

Business intelligence is most valuable when everyone can access the information they need. This webinar demonstrates how Nectari combines ERP data into interactive dashboards, KPIs, and

automated reports for both Sage 100 and Acumatica. Attendees will also see AI Copilot in action, using natural language questions to quickly retrieve business insights. The session explores role-based analytics, unified reporting, and how organizations can make faster, more informed decisions using real-time data.

eZCom: Automating Orders in Acumatica & Sage 100

Managing orders across customers, suppliers, retailers, and logistics providers doesn't have to rely on manual processes. This webinar explores how eZCom automates EDI transactions while integrating directly with Acumatica and Sage 100.

The session covers connecting ERP systems to trading partners, eliminating common order

workflow bottlenecks, automating the order-to-cash process, and improving supply chain visibility. Attendees will also see a live demonstration of how automation reduces manual data entry while improving order accuracy.

July 23 | 1:00–1:45 PM ET

July 30 | 1:00–1:45 PM ET

Summit: Secure, Scalable Sage 100 Access

Supporting Sage 100 users securely while reducing IT complexity is becoming increasingly important for growing organizations. This session

Topics include simplifying application deployment, supporting Sage 100 add-ons, reducing infrastructure management, improving security for remote users, and preparing for emerging AI governance considerations. Attendees will leave with practical strategies for building a more secure, scalable, and easier-to-manage Sage 100 environment.

Preparing For Year-End Starts Now

WHY Q3 IS THE BEST TIME TO PREPARE

Year-end always arrives faster than expected. While many organizations don't begin planning until the fourth quarter, starting earlier gives your team time to identify potential issues, improve reporting, and make system updates without the pressure of looming deadlines. Taking a proactive approach now can help ensure a smoother financial close and position your business for a successful start to the new year.

Review Your ERP Before Year-End

The third quarter is an excellent time to evaluate how your ERP system is supporting day-to-day operations. Reviewing user security, financial reports, inventory records, and integrated applications now allows you to address small issues before they become larger problems during year-end processing. It also provides an opportunity to verify that your reports, dashboards, and workflows continue to meet your organization's changing needs.

The Benefits of Planning Ahead

-  Save time during financial close
-  Improve accuracy and reduce errors
-  Strengthen security and minimize risk
-  Make better business decisions with reliable data

Challenge	How to Prepare
Slow financial close	Review reports before year-end
Inventory discrepancies	Audit inventory records
Outdated user permissions	Review security roles
Manual reporting	Automate recurring reports
Last-minute upgrades	Plan system updates now

A Strong Finish Starts with Good Planning

Preparing in the third quarter gives your organization the time and flexibility to address potential issues, take advantage of new features, and support your goals for the year ahead.

ACC Software Solutions is here to help you optimize your ERP and finish 2026 strong.
Let's build your game plan today.

Is Your ERP Still the Right Fit?

FIND OUT IF YOUR ERP IS SUPPORTING YOUR BUSINESS GOALS

Your ERP system should support your business today and scale with you tomorrow. As your company grows, changing processes, new technologies, and evolving customer expectations can expose gaps that weren't there when your ERP was first implemented.

If you've noticed increasing manual work, limited reporting, disconnected systems, or difficulty keeping up with business demands, it may be time to evaluate whether your current solution is still meeting your needs.

Complimentary 30-Minute ERP Fit Review

Schedule a Complimentary ERP Fit Review

ACC Software Solutions offers a free 30-minute ERP Fit Review to help you assess your current ERP environment. During the session, one of our ERP consultants will discuss your business goals, current challenges, and future plans to identify opportunities for improvement.

Whether you're looking to optimize your existing system or exploring a move to a modern cloud ERP, we'll provide practical guidance with no obligation.

Your ERP Fit Review includes:

- A discussion of your current ERP system and business processes
- Identification of common pain points and opportunities
- Recommendations for improving efficiency and visibility
- Expert guidance from ACC's ERP consultants

3rd Party Spotlights

ACUMATICA AND SAGE 100 INTERGRATIONS

We are excited to shine the spotlight on the 3rd party integration capabilities of Acumatica and Sage 100, leading ERP platforms. With these robust ecosystems of integration partners, you can seamlessly connect and integrate Acumatica or Sage 100 with a wide range of complementary applications, empowering your organization with enhanced functionality, automation, and efficiency.

Sage Business Partner

Acumatica
The Cloud ERP

ADP helps businesses streamline payroll, human resources, benefits administration, and workforce management by integrating employee information with your ERP system. By reducing duplicate data entry and improving the flow of payroll and employee information, organizations can save time, improve accuracy, and simplify HR processes. From onboarding new employees to managing payroll and compliance, ADP provides the tools businesses need to support a growing workforce.

Sage Business Partner

Acumatica
The Cloud ERP

Keeping up with changing sales tax regulations can be challenging, especially for businesses operating across multiple states or jurisdictions. Avalara integrates with Sage 100 and Acumatica to automate tax calculations, manage exemption certificates, and simplify tax compliance. By eliminating manual calculations and helping ensure accurate tax reporting, Avalara reduces administrative work while giving finance teams greater confidence in their compliance processes.

Acumatica
The Cloud ERP

AcuWoo Commerce seamlessly connects WooCommerce with Acumatica, creating a real-time link between your online store and your ERP system. Product information, inventory levels, customer records, and orders automatically synchronize between platforms, reducing manual data entry and improving order accuracy. By keeping ecommerce and back-office operations connected, businesses can process orders more efficiently while delivering a better experience for customers.
